

Week 9

RDD and Flatmap

```
// words with count greater than 4  
// count, sc
```

```
data = sc.textFile("sparkdata.txt")  
data.collect();
```

```
val splitdata = data.flatMap(  
    line => line.split(" "));
```

```
splitdata.collect;
```

```
val mapdata = splitdata.map(  
    word => (word, 1));
```

```
mapdata.collect;
```

```
val reducedata = mapdata.reduceByKey(_+_);
```

```
reducedata.collect;
```

```
package main {;
```

```
object main {
```

```
    def main(args: Array[String]):
```

```
        unit = {
```

```
            for (i <- 0 to reducedata.len) {
```

```
                if (reducedata.len > 4) {
```

```
println(reducedata["?"])} }
```

```
}}
```

Output :-

Hello
